Career Goals

I aim to become a strong Backend Developer who not only masters technical foundations but also understands product value and contributes directly to business goals. With hands-on experience from real-world projects, I'm looking for a professional and growth-oriented environment where I can learn from talented teammates, take on meaningful challenges, and sharpen my system design and problem-solving skills. My long-term goal is to advance into a senior or technical leadership role, building scalable, efficient, and reliable backend systems.

Skills

- Backend Development:** RESTful APIs with NestJS, WebSocket, third-party integrations (auth, payments, chatbots)
- Programming & Database:** TypeScript, Java, PostgreSQL, MongoDB, ORM (Prisma, Hibernate)
- DevOps & System:** Docker, CI/CD, Swagger, Git, cloud deployment (Render, Vercel, Azure)
- Security:** OAuth, authentication protocols, secure API design
- Collaboration:** Agile/Scrum, GitHub Project, cross-functional teamwork, leadership
- Soft Skills:** Technical communication, problem solving, adaptability, time management

Education

- Sep, 2021 – Nov, 2025**
Major: Software Engineering
at FPT Quy Nhon University AI Campus
GPA: 7.94

Work Experiences

Jun – July, 2025

PAXU - Manage your spending effectively

Job remote & part-time at MMSofts Company

- Role: **Backend Developer** | Team size: 7
- Developed PAXU, a personal finance app enabling spending management, borrowing/repayment capacity calculation, brokerage fee estimation, and living cost comparison for relocation decisions
 - Built backend with NodeJS, Express, MongoDB, and Parse Server
 - Migrated Parse Server from 2.8 → 8.2.1 and upgraded MongoDB from v4 → v6
 - Updated Parse JS SDK to latest version for Admin Dashboard
 - Collaborated with a remote team developers to deliver scalable and maintainable solutions

May – Aug, 2024

Content Migration Project – Adobe Experience Manager (AEM)

On-The-Job Training at FPT SOFTWARE QUY NHON CO. LTD

- Role: **Dev Migration** | Team size: ~40
- Participated in a large-scale content migration project using Adobe Experience Manager (AEM), focusing on structured workflows and quality assurance within an enterprise environment.
 - Migrated and validated landing pages from legacy systems to AEM
 - Ensured data consistency and content integrity across environments
 - Followed task workflows using Jira, maintained QA checklists in Excel
 - Gained practical experience in agile collaboration, team coordination, and enterprise-level communication

Projects

May – Aug, 2025

TheSync – Group Formation and Capstone Thesis Development

Software Engineering Capstone Project

- Role: **Backend Developer, Team Leader** | Team size: 5
- Developed a thesis management platform with AI-powered topic suggestions, real-time notifications, and multi-role support.
- Built scalable REST APIs using NestJS, Prisma, and PostgreSQL, integrating Google Gemini AI, Pinecone, and Redis for advanced functionality.
- Implemented complex business logic for thesis lifecycle, group formation, and peer review management.
- Github Repo**
 - Backend: <https://github.com/5-logic/the-sync-backend>.
 - Frontend: <https://github.com/5-logic/the-sync-frontend>.

Jan – Mar, 2025

BrainBox – E-learning Platform

- Role: **Backend Developer, Team Leader** | Team size: 6
- Built a scalable e-learning platform with paid courses, instructor dashboards, and AI chatbot support.
- Developed REST APIs using NestJS, integrated WebSocket for real-time chat, and designed database with Prisma + PostgreSQL.
- Implemented authentication (Clerk), payments (PayOS), and deployed on Render (backend) and Vercel (frontend).
- Github Repo**
 - Backend: <https://github.com/lzaycoe/brainbox-backend>.
 - Frontend: <https://github.com/lzaycoe/brainbox-frontend>.

Sep – Nov, 2024

lidgevan – Japanese Language Center Management System

- Role: **Backend Developer** | Team size: 6
- Built a web application for managing teachers, students, classes, attendance, schedules, and payments across multiple language centers.
 - Developed backend with NestJS, integrated MongoDB and documented APIs using Swagger
 - Implemented salary automation, attendance tracking, and scheduling logic
 - Integrated payment gateways (ZaloPay, MoMo) in sandbox mode
 - Deployed backend on Azure, frontend (React + Ant Design) on Render
- Github Repo:** <https://github.com/hardingadonis/lidgevan>
